Nils Kok presents at Greenbuild 2011 in Toronto

Heading into the 11th Greenbuild, our education program continues to evolve with a fresh approach to entertaining and motivating you inside the session room.

Check out some of the changes I'm most excited about:

- **Shorter education sessions = 60 minutes**. In an effort to help you make the most of your experience, education sessions are now hour-long presentations. View the program »
- **Earn your continuing education**. This year we're increasing time slots and education opportunities. LEED APs and Green Associates can still earn one year's worth of continuing education credits at Greenbuild. Learn more »
- **USGBC Updates are one track**. In the past, specialty updates were offered during one time slot, and you told us it wasn't working. So we're changing it up. In 2012, if you wish, you will have the opportunity to attend every USGBC update.
- **More special sets**. This is your year to experience the magic of special sets. Special sets feature unique stages, lighting, audience polling and interactive presentation styles to better engage the audience. Forty sessions will be held on a special set.
- **Start scheduling and connecting**. Looking to connect with an attendee, exhibitor, or presenter? Greenbuild Connect not only reserves your seat in education sessions, it also helps you plan your entire Greenbuild experience. Greenbuild Connect »

What are you looking forward to learning @ Greenbuild 2012? Let us know and tweet @Greenbuild.
