LEED O+M: Existing Buildings | v3 - LEED 2008

LEED certified design and construction

SSc1 | Possible 1 point

Glossary

Intent

To reward environmentally sensitive building design and construction, thereby enabling high-performance building operations to be achieved more easily.

Requirements

Choose one of the following options:

Option A

Show that the building has previously been certified under LEED for New Construction or LEED for Schools.

Option B

Show that the building has previously been certified under LEED for Core & Shell, and at least 75% of the floor area has also been certified under LEED for Commercial Interiors.
