

# Lauren Riggs

## Manager, LEED Performance

### U.S. Green Building Council

Lauren joined USGBC in 2006. She is responsible for the management of the Building Performance Partnership and LEED Recertification. In alignment with her building performance efforts, Lauren also oversees the development of LEED's new credit category: Performance (PF). Lauren's work emphasizes the imperative linkages between the existing buildings certification process and requirements and ongoing tracking of building performance.

Her focus on building performance originates from her involvement in the LEED for Existing Buildings v2.0 revisions, which yielded the current LEED for Existing Buildings: O&M Rating System and Reference Guide. Lauren's leadership and technical expertise has also contributed to the LEED 2009 reference guides, LEED 2009 data center compliance paths and Energy & Atmosphere (EA) requirements for the next version of LEED.

Lauren holds a bachelor's degree in Environmental Science and Economics from St. Mary's College of Maryland.

USGBC is a non-profit organization with a core purpose of transforming the way buildings and communities are designed, built and operated, enabling an environmentally and socially responsible, healthy and prosperous environment that improves the quality of life.
