

TSAC Soliciting Submittals Regarding the Use of HCFCs:

The LEED™ Technical and Scientific Advisory Committee is currently soliciting submittals from stakeholders interested in the HCFC issue. These submittals are meant to supplement the documents that have already been submitted to the USGBC, and should focus only on new data, facts or developments relating to the use of HCFC-based refrigerants or alternatives. This information will be used by the TSAC and its HCFC Task Group in order to evaluate how HCFC's in mechanical equipment are treated for the award of credits in the LEED™ Green Building Rating System . Submittals should be sent in electronic format to tsac@usgbc.org, and must be received by March 30, 2003.
