

LEED ID+C: Retail | v3 - LEED 2009

Building reuse - maintain interior nonstructural elements

MRC1.2 | Possible 2 points

Glossary

Intent

To extend the life cycle of existing building stock, conserve resources, retain cultural resources, reduce waste and reduce environmental impacts of new buildings as they relate to materials manufacturing and transport.

Requirements

Maintain at least 40% or 60% by area of the existing non-shell, nonstructural components (e.g., walls, flooring and ceiling systems). The minimum percentage interior component reuse for each point threshold is as follows:

Interior Reuse	Points
40%	1
60%	2
