

| v3 - LEED 2008

Emissions reduction reporting

EAC6 | Possible 1 point

Glossary

Intent

To document the emissions reduction benefits of building efficiency measures.

Requirements

Identify building performance parameters that reduce conventional energy use and emissions, quantify those reductions and report them to a formal tracking program:

Track and record emissions reductions delivered by energy efficiency, renewable energy and other building emissions reduction measures, including reductions from the purchase of renewable energy credits.

Report emissions reductions using a third-party voluntary reporting or certification program (e.g., EPA Climate Leaders, ENERGY STAR or WRI/WBCSD protocols).
