

| v2 - LEED 2.0

Controllability of systems - lighting

EQc6.1 | Possible 1 point

Glossary

Intent

Provide a high level of lighting system control for individual occupants, and specific groups in multi-occupant spaces (e.g., classrooms and conference areas), to promote the productivity, comfort and well-being of building occupants.

Requirements

Provide lighting controls for:

- At least 90% of occupants, enabling adjustments to suit individual task needs and preferences,
- AND**
- All shared multi-occupant spaces where transient groups must share lighting controls.
