

LEED BD+C: Core and Shell | v4 - LEED v4

## Construction activity pollution prevention

Required

Glossary

### Intent

To reduce pollution from construction activities by controlling soil erosion, waterway sedimentation, and airborne dust.

### Requirements

Create and implement an erosion and sedimentation control plan for all construction activities associated with the project. The plan must conform to the erosion and sedimentation requirements of the 2012 U.S. Environmental Protection Agency (EPA) Construction General Permit (CGP) or local equivalent, whichever is more stringent. Projects must apply the CGP regardless of size. The plan must describe the measures implemented.
