

LEED ND: Built Project | v4 - LEED v4

## Infrastructure energy efficiency

Possible 1 point

Glossary

### Intent

To reduce the environmental harms from energy used for operating public infrastructure.

### Requirements

Design, purchase, or work with the municipality to install all new infrastructure (e.g., traffic lights, street lights, water and wastewater pumps) to achieve a 15% annual energy reduction below an estimated baseline energy use for this infrastructure. When determining the baseline, assume the use of lowest first-cost infrastructure items.
