## Rapidly renewable materials

MRC6 | Possible 1 point

Glossary

### Intent

Reduce the use and depletion of finite raw materials and long-cycle renewable materials by replacing them with rapidly renewable materials.

### Requirements

Use rapidly renewable building materials and products (made from plants that are typically harvested within a ten-year cycle or shorter) for 2.5% of the total value of all building materials and products used in the project, based on cost. Furniture may be included, providing it is included consistently in MR Credits 3-7.

Furniture is defined as either retail display/shelving that is purchased as a unit from a manufacturer (regardless of where the assembly takes place) or as modular/freestanding furniture.

Please note that casework and built-in millwork items must be included in the base building calculations.
