The Trash Monster at Greenway

National Green Week is a time to make students aware of important sustainability topics and get them excited to do their part to make a difference! What better way to drum up enthusiasm than with a fun and educational contest?

This year, there are three contests available at the national level during Green Week, each with their own great prizes and sustainability focus. Visit our website to [learn more about the contests](#) or keep reading.

Green in Action Awards.

Green In Action Awards are granted to inspiring projects based on GEF's [sustainability themes](#). Winners are those schools, classrooms or youth groups who have demonstrated their commitment, creativity, or passion for sustainability in their application. Great application materials include photos, videos, essays, or artwork describing your environmental project, weigh-in, activity, community service project, or green team program. There are so many ways to participate and make a difference so show us how you are a champion for sustainability!

Submissions will be reviewed and assessed based on creativity, educational value, and potential for sustainability and replication. Winners receive \$250 for their school or group and will be featured on GEF's website. Read the complete contest rules, get project ideas, and view award winners from previous years in the [Green in Action section](#) of the website.

Water Audit Raffle

One winner will receive \$250 to put toward math or science supplies and 500 reusable water bottles for their school. Conducting a water audit of your home or school is a great way to understand how much water you use (and possibly waste!) every day. You'll also identify areas in need of improvement - being aware is the first step in taking action and making a big difference. Use one of GEF's free water audits, or use your own, and submit a summary of the results or the completed worksheet by May 31 to be entered to win. [Read more about the contest](#) in the Sustainable Water Challenge section.

Green Classroom Pledge

The Green Classroom Pledge outlines simple ways a classroom can have a significant impact on the environment. Although the actions may seem small and insignificant on the individual level, by working together the classroom can have a big collective impact. Students are also encouraged to help their families save energy, waste and water at home by implementing some of the items on the pledge. Have your students sign the pledge and take a picture of the group. Submit it to GEF by April 30 for a chance to win 20 Green Packs for their classroom. Green Packs include a reusable shopping bag, water bottle and snack containers. Find the complete rules and [download the pledge](#) in the Green Energy Challenge section.

Green T-Shirt Design Contest

This year, K-5 students in MA, RI and NY are invited to participate in the t-shirt design contest by creating a drawing on an 8.5x11 paper that answers the question: "What's your favorite way to save energy?" One winner from MA or RI will throw the first pitch at a Red Sox game and will receive \$250 for their school and t-shirts with their winning design for the classroom. One winner from New York will receive \$250 for their classroom and t-shirts with their winning design for the classroom. Read the [complete contest rules](#) in the Green Energy Challenge section. The deadline to receive applications is March 15.

Energy Spotlight School

Energy Spotlight Schools are those schools or classrooms in MA, RI or NY who make energy a priority. Whether you conduct lessons during class, organize an audit, promote behavior change at school, or tackle a building update, we want you to tell us all about it!

If you haven't started yet, but want to become an energy spotlight school, get started with free lessons, activities, audits and more through the Green Energy Challenge! The winner will receive 100 Green Packs for the school and will be featured on GEF's website. Green Packs include reusable shopping bags, snack containers and water bottles.
