LEED in Motion

USGBC has released a new infographic to illustrate how the LEED green building rating system has contributed to the growth of an entire global industry devoted to creating a sustainable built environment.

The infographic, "LEED in Motion: Driving the Green Building Industry," is a visual depiction of the many facets of LEED, the voluntary, market-based program developed by USGBC that has changed the way our society thinks about buildings and their role in global environmental stewardship.

It highlights the incredible breadth of LEED's supporters — namely, the 77 USGBC chapters working on the local level to advance green building in states and cities, USGBC's network of more than 12,000 member companies, the 185,000 LEED Accredited Professionals and Green Associates with advanced technical knowledge of green building design and implementation, as well as the 94 Green Building Councils around the world.

The graphic also reflects LEED's role as a true driver of momentum in the global green building industry, from its rigorous technical development process, to the many marketing benefits it provides to certified projects, to its proven performance in helping certified structures reduce greenhouse gas emissions and mitigate their energy and water use, among many other features.

#### THE TOTAL COST FOR CERTIFICATION. 1,050 projects have been certified under the LEED Volume program since 2006

16,769,615 STUDENTS are in schools with Green Building Policies

### NETWORK OF INDUSTRY LEADERS more than 12,000

LEADERS more than 12,000 diverse member companies representing the entire building industry

USGBC is part of a network of 90+ INTERNATIONAL GREEN BUILDING COUNCILS

Market driven, market approved

USGBC has 10,465 Facebook fans and 53,747 Twitter followers

I'm from Iran
I am a student
Master of Architecture
I work in the field of sustainable energy

I wanted to leed have a representative in order to build good buildings  $\mbox{We}$  have a representation of you?
