Requirements

Case 1. Classrooms and core learning spaces < 20,000 cubic feet (560 cubic meters)

For classrooms and core learning spaces less than 20,000 cubic feet, options for compliance include:

Option 2. Compliance with ANSI Standard S12.60-2002 or non-U.S. equivalent

Confirm through calculations described in ANSI Standard S12.60-2002 that rooms are designed to meet reverberation time requirements as specified in that standard. Projects outside the U.S. may use a local equivalent to ANSI Standard S12.60-2002.
