Welcome back to the LEED v4 first look series, where we're giving you a sneak preview at the new or updated tools and resources that are part on the LEED v4 program. Everything that we've done has been based on the great feedback we've received from a number of sources including LEED volunteers, participants in the LEED v4 Beta (who are actually certifying projects using the LEED v4 credits and tools) and other LEED practitioners.

LEED Online Forms (part 2)

In the [previous article](#) in this series, we previewed the changes being made to LEED Online forms for LEED v4 (that will also be extended to LEED 2009 forms). We showed how, across the board, our approach to these new forms has been focused on streamlining and simplifying, saving project teams valuable time. There's now a smaller set of forms that are designed to support multiple projects types.

This week, we're doing a deeper dive into the LEED v4 forms themselves. In working on the forms for each credit, the key goal has been clarity. We want to make sure that project teams understand how each form works and the level of effort needed to complete it. We've even made updates to the way you determine whether the form is complete and ready for submission. Forms that are more intuitive are just another way we're working to save project teams time and money.

Here are some of the key features:

Improved wayfinding: side margin for notes, clear headings for section divisions, clear designation of projects that may fall into a certain case ("For project pursuing...")

□

Clear representation of the point thresholds for given credits

□

Conditional branching: a feature that changes the information you see based on the options/paths within the rating system – this means that you won't see information that isn't relevant to you, but you will see everything that is

□

Form completion check functionality: located in the summary section

□

Stay tuned for more previews related to LEED v4. Next week, we'll look at tools available online. Have questions? [Learn more about LEED v4](#) or [email us](#).
