

# INTERNATIONAL WATER LABELING PROGRAMS

## WaterSense Equivalencies

In the following countries, project teams must select fixtures with the designated label in place of the WaterSense requirement:

COUNTRY / REGION	LABEL	WEBSITE
Australia	WELS (4 stars out of 6)	<a href="http://www.waterrating.gov.au">www.waterrating.gov.au</a>
Canada	WaterSense	

## Non-mandatory Labels

The following water efficiency fixture labels are recognized as market transformational, and are recommended, but not required for LEED projects:

COUNTRY / REGION	LABEL	WEBSITE
European Union	European Water Label	<a href="http://www.europeanwaterlabel.eu/findaproduct.asp?product=1820">www.europeanwaterlabel.eu/ findaproduct.asp? product=1820</a> <a href="http://www.well-online.eu">www.well-online.eu</a>
Taiwan	Water Saving Label	
China, Hong Kong	WELS	<a href="http://www.wsd.gov.hk/en/plumbing_and_engineering/wels/index.html">www.wsd.gov.hk/en/ plumbing_and_engineering/ wels/index.html</a>

Note: countries without a listed labeling program must meet the flush and flow requirements of “Table 6. Maximum installed flush or flow rates for prescriptive path” listed in the Step-by-Step Guidance section of the LEED Reference Guide.
